The Introduction of
DE-CIX Indonesia

We make interconnection easy. **Anywhere.**

Ref.No.: 002/DXID/SLS/QUO/IV/2024

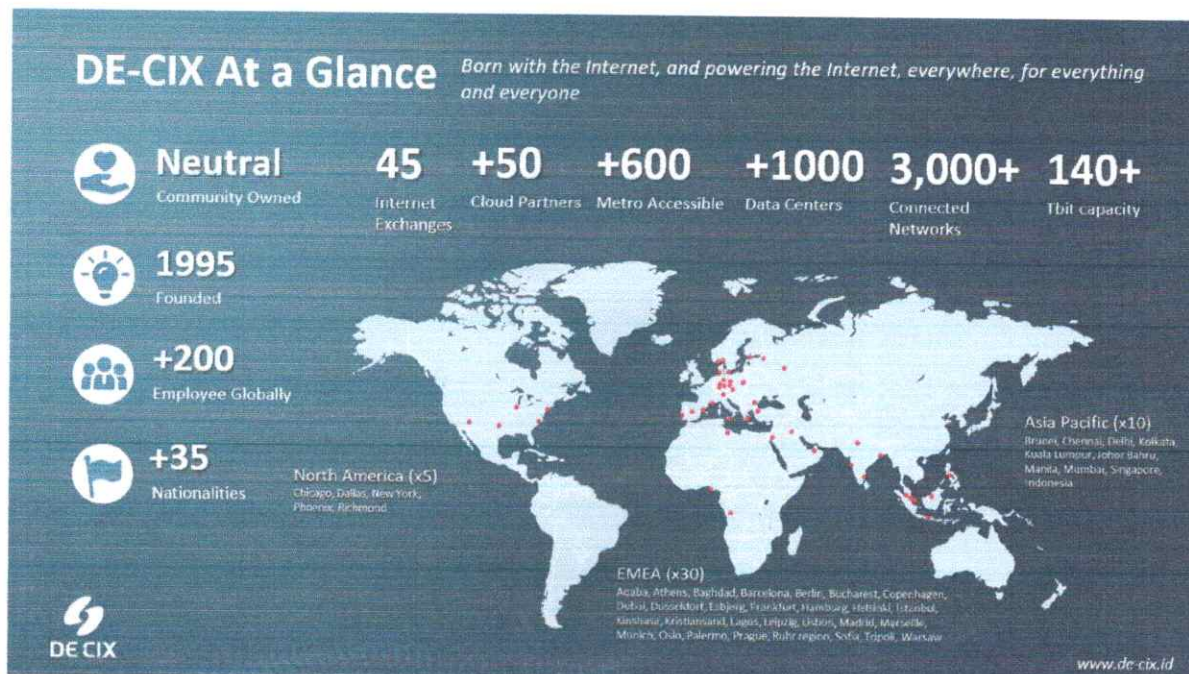

Batam Bintang Telekomunikasi (OFON)

Attn. To:

Mr. Rahmad Sis

About Us

Founded in 1995, DE-CIX's Internet Exchange in Frankfurt is the world's leading interconnection platform. With our Internet Exchanges, we create and run interconnection platforms, while at the same time building the entire interconnection ecosystems for the benefit of all connected networks. We take care of the constant flow of data and make sure that everything runs fast and securely.

DE-CIX is expanding its interconnection in Indonesia and will establish a distributed IX using the award-winning **DE-CIX Apollon platform**. DE-CIX Indonesia will also be connected into DE-CIX ASEAN, integrating it into the Southeast Asian interconnection ecosystem – now covering six metro markets: Jakarta, Singapore, Kuala Lumpur, Johor Bahru, Brunei, and Manila. DE-CIX Indonesia will operate both, **DE-CIX GlobePEER Jakarta** as the local exchange and **DE-CIX GlobePEER ASEAN** exchange.

Why Us?

Multiple services reach with only 1 access

Improved network quality and better **end-user experience**

Built-in redundancy, flexible bandwidths

Backed by industry leading SLAs 99.99%

DE-CIX Apollon with cutting edge technology

Our Services

1. Port Access

Physical interface to the Apollon platform in a DE-CIX location and available in pre-defined capacity steps (1 / 10 / 100 GE). Product is identical across all DE-CIX locations and customer can order multiple accesses.

2. GlobePEER

Allowing the networks to connect directly into and exchange traffic instantly. There is no need to arrange peering agreements for dozens of networks by contacting them individually. Peering provides the lowest latency path and reliability to improve network quality. This service is available for JKT and ASEAN peers.

3. MAPS (Microsoft Azure Peering Service)

Direct connection to Microsoft's SaaS Cloud Services, such as Microsoft 365 and Dynamics 365, with high performance connectivity and a guaranteed DDoS-free connection. This service offers additional features such as telemetry, configuration, and traffic engineering possibilities.

4. VirtualPNI (Private Network Interface)

Virtual PNI is Point-to-Point Service to exchange traffic directly and privately within and between metro regions from your on-premises equipment and the DE-CIX Cloud ROUTER. Customers can extend their networks using our platform to connect to other customers / partners.

5. DirectCLOUD (AWS / Google / Azure)

Direct, secure and dedicated connection to a cloud service provider. DE-CIX extends the customer VLAN into the cloud based on VirtualPNI technology. This service is very simple and fast setup, minimizing down-time with flexible contract terms.

6. Cloud ROUTER

Simplify hybrid and multi-cloud strategy with route traffic privately between clouds environment in virtual router. Flexibility to manage the network directly via the portal and API or through our DE-CIX Specialists.
